VOL. 12, NOS. 1–4 ENGINEERING COSTS & PRODUCTION ECONOMICS JULY 1987

CONTENTS

The Proceedings of the Fourth International Working Seminar on Production Economics

Preface *R.W. Grubbström and H.H. Hinterhuber* 1

Theoretical Approaches

A multivariate utility function approach to stochastic capacity planning *D.B. Rinks, J.L. Ringuest and M.H. Peters (Baton Rouge, LA, U.S.A.)* 3

Comparison of the discrete and continuous-time stochastic selling models *V. Saario (Tampere, Finland)* 15

The feasible admission to the optimization of exploitation of tree stems *E.P. Liski and V. Saario (Tampere, Finland)* 21

Dimensioning of bus driver buffers subject to variations in the traffic load *H. Jönsson (Linköping, Sweden)* 29

Decomposition principles applied to the dynamic production and work-force scheduling problem *K. Aardal (Linköping, Sweden) and A. Ari (Lulea, Sweden)* 39

Operation plan optimization of porcelain production *J. Kotowski and M. Sygit (Wroclaw, Poland)* 51

The firm's investment policy under a concave adjustment cost function *P.M. Kort (Tilburg, The Netherlands)* 57

On similarities between lot sizing and clustering *P.J. Weeda (Enschede, The Netherlands)* 65

An analysis of heuristic trim-loss algorithms *M. Rode and O. Rosenberg (Paderborn, Germany)* 71

Production Control

Economic evaluation and analysis of flexible manufacturing systems *G.J. Miltenburg (Hamilton, Ontario, Canada)* 79

Robot's economic repeatability *L. Abdel-Malek (Newark, NJ, U.S.A.)* 93

Production-economic aspects on setup efficiency *A. Eriksson (Gothenburg, Sweden) and J. Olhagher (Linköping, Sweden)* 99

Tool sharing in FMS — a feasibility study *G.J. Gaalman, W.M. Nawijn (Twente, The Netherlands) and L.W. Platzer (Eindhoven, The Netherlands)* 107

Just-in-time from a business logistics perspective: a preliminary study of the effects on external transportations *D.N.G. Storhagen and R. Hellberg (Linköping, Sweden)* 117

On the development of systems for the control of production and materials in a corporation organized into profit centers — *J. Kuuti (Salo, Finland)* — 123

Utilization of microcomputers in production and inventory control — *A. Lehtimäki (Tampere, Finland)* — 131

Inorga scheduling system — *Z. Safka (Prague, Czechoslovakia)* — 137

Surplus or disposal quantities in optimal program planning in joint production — *G. Fandel (Hagen, F.R.G.)* — 143

A decision support system for long range manufacturing resource planning — *P. Lundell and B. Ostlund (Linköping, Sweden)* — 159

Production Control in a Consumer Electronics Factory

Production control in a consumer electronics factory — *J. Wijngaard (Eindhoven, The Netherlands)* — 165

Capacity analysis of two-stage production lines with any products — *M.B.M. de Koster (Eindhoven, The Netherlands)* — 175

Information systems for assemble-to-order production — *J.C. Wortmann (Eindhoven, The Netherlands)* — 187

Commonality and safety stocks — *K. van Donselaar and J. Wijngaard (Eindhoven, The Netherlands)* — 197

Investment and Financial Planning

Sequential investment planning based on stochastic models — *P. Kelle (Budapest, Hungary)* — 205

Optimal dynamic portfolio selection and firm behaviour under personal taxation — *G.-J. van Schijndel (Tilburg, The Netherlands)* — 211

A KB/DSS for financial planning — *M. Klein and T. Viledieu (Jouy-en-Josas, France)* — 219

Capital costs and a point-in–point-out inventory investment under uncertainty — *P. Hultman and A. Thorstenson (Linköping, Sweden)* — 229

Measuring the efficiency of service operations: an application to bank branches — *C. Parkan (Calgary, Alberta, Canada)* — 237

Strategic Planning for Production Systems

Evolving the manufacturing strategy — *D.C. Whybark (Lausanne, Switzerland)* — 243

Sensitivity of economic objectives in strategic dynamic power system planning — *G. Rabinsteiner (Graz, Austria)* — 251

Improvement curve analysis of changeovers in JIT environments — *J.G. Carlson (Los Angeles, CA, U.S.A.)* — 259

From profit center to strategy management — a contemporary management approach for implanting strategies — *W. Schertler (Innsbruck, Austria)* — 267

Inventory Control

Analysis of a multi-echelon production-inventory system with random supply *A. Chikán (Budapest, Hungary)* 275

Biased selection of the inventory reorder point when demand parameters are statistically estimated *E.A. Silver and M.R. Rahnama (Calgary, Alberta, Canada)* 283

Econometric analysis of inventory investment and the role of short-term expectations *K. Kyläheiko and T. Pirttilä (Lappeenranta, Finland)* 293

Planning of production under environmental constraints *F. Wirl, G. Infanger and E. Unterwurzacher (Vienna, Austria)* 299

Production Innovation Management

Dilemmas of innovation management *H. Kasper (Vienna, Austria)* 307

Production innovation management and economies of scope: beyond the "Technological Fix" *M. Jelinek (Cleveland, OH, U.S.A.)* 315

Innovative programs for the long-term survival of the American hospital industry *J.R. Minifie and R.A. Davis (Lubbock, TX, U.S.A.)* 327

Economies of computerized maintenance management systems *J.V. Krouzek (Prague, Czechoslovakia)* 335

Production Information Systems

Corporatewide information requirements analysis and financial, marketing and production planning *H. Kivijärvi (Helsinki, Finland) and M. Tuominen (Lappeenranta, Finland)* 343

Designing an information system for the perishable tools inventory: a hybrid approach *C.A. Snyder (Auburn, AL, U.S.A.) and J.F. Cox (Athens, GA, U.S.A.)* 357

Transportation

Application of multicriterional analysis to the ranking and evaluation of the investment programmes in the ready mixed concrete industry *Z. Ribarovic and N. Mladineo (Split, Jugoslavia)* 367

Product Pricing and Costing

Pricing — a strategic decision *T. Hartman and T. Lindblom (Gothenburg, Sweden)* 375

Proposed research into a method for assessing and modelling design productivity in the electronics industries *C. O'Brien and B. Chiplin (Nottingham, England)* 383

Learning and production costs: an application of a cost prediction model to a fighter airframe programme *T.R. Gulledge (Baton Rouge, LA, U.S.A.), N.K. Womer (University, MS, U.S.A.) and J.D. Camm (Cincinnati, OH, U.S.A.)* 389

A framework for productivity analysis at the organisational level: method and an applied case *A. Bennett, M. Silver and J. Hui (Bath, U.K.)* 401

Author and Title Index 413
